

That Alphabet.

In yesterday's *Herald* an extract from the *New York Sun* is published, in which considerable notoriety is given to a Professor (?) Wm. Willes, on account of his having sent what is by the *Sun* termed a "new alphabet." This new thing is well known in Utah by the name of Desert Alphabet, and is the emanation of several other crack-brained lunatics.

Will not some one please send a copy of Willes' "Songs of Zion," so that the *Sun* may see what kind of a Professor he is?
